EDUCATION

University College London

MRes in Biosciences: Neuroscience

London, UK

Sept 2021 - Sept 2022

Peking University

BS in Computer Science

Beijing, CN

Sept 2016 - Jun 2020

SELECTED RESEARCH PROJECTS

A computational framework to investigate the functional specificity of cortical neurons

University College London

Advised by Prof. Michael Häusser and Dr. Brendan Bicknell

Dec 2021 - Present

- Derived a general learning rule based on cable theory and Hodgkin-Huxley equations with which detailed models of neurons, comprising 3D reconstructed morphologies and an array of active conductances, can be 'trained' to perform sophisticated computational tasks.
- Designed a battery of tasks with distinct processing requirements, including: nonlinear feature-binding computations, Boolean logic operations, and a regression task designed to test the limits of stimulus selectivity.
- Identified a diverse set of morphological and biophysical features to explain the computational performances of different neuron models.
- Constructed an efficient and flexible software package to support the training of neuronal models and analysis.

Inferring neural properties from neural data across scales

Beijing Academy of Artificial Intelligence

Advised by Prof. Kai Du (PKU) and Prof. Jun Ding (Stanford)

Jan 2020 - Present

- Proposed a general domain adaptive neural inference framework to infer biophysical properties and connectivity.
- Designed self-training and domain adaptation to avoid biased inference results caused by the out-of-distribution problem between synthetic data and experimental data.
- Accurately and efficiently inferred biophysical properties of 550 neurons across 14 brain regions of mice and those of the stomatogastric ganglion microcircuit of the *Cancer Borealis*.
- Achieved near-optimal accuracy in inferring monosynaptic connectivity of networks in the CA1 region of mice.

Geometric analysis of the influence of retina on cortical decision boundaries

Peking University

Advised by Dr. Kai Du

March 2022 - Sept 2022

- Approximated dynamics of retinal gap junction networks by a recurrent neural network based on derivations of conductance-based neuronal models.
- Drafted the manuscript and prepared the figures.

Dendrites 2020: Dendritic anatomy, molecules and function; May 2022; Heraklion, Greece.
- **Sheng, K.**, Qu, P., Yang, L., Liu, X., He, L., Ma, L., & Du, K. A General LSTM-based Deep Learning Method for Estimating Neuronal Models and Inferring Neural Circuitry.
Third Chinese Computational and Cognitive Neuroscience Conference; June 2021; Shenzhen, China.

WORKING EXPERIENCE

Research Assistant **University College London**
Neural Computation Lab Oct 2022 - Present

- Established a theoretical framework for investigating principles of single neuron computation.

Research Assistant **International Brain Laboratory**
Neural Analysis Group Oct 2022 - Present

- Facilitated the development of the electrophysiology atlas platform.

Leader of Application Research Team **Beijing Academy of Artificial Intelligence**
Life Simulation Research Center Jun 2021 - Sept 2021

- Organized research cooperation among researchers and interns.
- Scheduled and summarized weekly discussions on the progress of research projects of the group members.

Software Development Engineer **Beijing Academy of Artificial Intelligence**
Life Simulation Research Center Jun 2020 - Sept 2021

- Developed an automatic tool for parameter estimation and optimization for computational neural models.
- Published a preprint paper of the tool on bioRxiv.

TEACHING EXPERIENCE

Teaching Assistant **Peking University**
Compiler Practice Feb 2020 - Jun 2020

- Guided students to work through each stage of compiler design, including symbol table construction, type check, intermediate representation generation, register allocation.

Teaching Assistant **Peking University**
Algorithm Design and Analysis Seminar Feb 2019 - Jun 2019

- Reviewed and expanded lecture content based on *Introduction to Algorithms*.
- Designed exam papers and provided references on reinforcement learning.

ACADEMIC SERVICE

Reviewer of Bioscience Horizons Nov 2021 - Present

LEADERSHIP EXPERIENCE

President and Captain **Peking University**
Badminton Association and Team of Peking University Sept 2019 - Jun 2020

- Organized badminton competitions at Peking University and scheduled friendly matches among colleges.
- Popularized badminton through social media at Peking University.
- Led weekly training and competitions.

AWARDS

Outstanding Graduate of Peking University	Sept 2019
Robin Li Scholarship of Peking University	Sept 2019
Excellent Research of Peking University	Sept 2019
Ke Chuanglong Scholarship of Peking University	Sept 2018
Merited Student of Peking University	Sept 2018 & Sept 2017
May Fourth Scholarship of Peking University	Sept 2017

SKILLS

Languages	Python, C/C++, MATLAB
Framework	NEURON, NEST, PyTorch
