## EDUCATION

### University College London

MRes in Biosciences: Neuroscience

London, UK

Expected Sept 2022

### Peking University

BS in Computer Science

Beijing, CN

Jun 2020

## SELECTED RESEARCH PROJECTS

### A computational framework to investigate the functional specificity of cortical neurons University College London

Advised by Prof. Michael Häusser and Dr. Brendan Bicknell

Dec 2021 - Present

- Developed a general learning rule based on cable theory and Hodgkin-Huxley equations with which detailed models of neurons, comprising 3D reconstructed morphologies and an array of active conductances, can be 'trained' to perform sophisticated computational tasks.
- Trained biophysical models from Allen Cell Types Database to implement nonlinear feature-binding computations, Boolean logic operations, and a regression task designed to test the limits of stimulus selectivity.
- Identified a diverse set of morphological and biophysical features to explain the computational performances of different neuron models.

### Inferring Neural Properties from Neural Data across Scales

Beijing Academy of Artificial Intelligence

Advised by Dr. Kai Du, Dr. Shanghang Zhang and Dr. Lei Ma

Jan 2020 - Present

- Proposed a general domain adaptive neural inference framework to infer biophysical properties and connectivity.
- Designed self-training and domain adaptation to avoid biased inference results caused by out-of-distribution problem.
- Accurately and efficiently inferred biophysical properties of 550 neurons across 14 brain regions of mice and those of a microcircuit with 3 neurons of *Cancer Borealis*.
- Achieved near-optimal accuracy in inferring monosynaptic connectivity of networks in the CA1 region of mice.

### Geometric Analysis of the Influence of Retina on Cortical Decision Boundaries

Peking University

Advised by Dr. Kai Du

March 2022 - Sept 2022

- Approximated dynamics of retinal gap junction networks by a recurrent neural network based on derivations of conductance-based neuronal models.
- Drafted the manuscript and prepared the figures.

## PRESENTATIONS

### Posters

- **Sheng, K.**, Bicknell, B.A., Häusser, M. Computational Specialization of Cortical Dendrites. Neuroscience 2022; Dec 2022; San Diego, United States.

- **Sheng, K.**, Bicknell, B.A., Häusser, M. Computational Specialization of Cortical Dendrites. *UCL Neuroscience Symposium 2022*; June 2022; London, United Kingdom.
- Bicknell, B.A., **Sheng, K.**, Häusser, M. Learning to Harness Dendritic Computations. *Dendrites 2020: Dendritic anatomy, molecules and function*; May 2022; Heraklion, Greece.
- **Sheng, K.**, Qu, P., Yang, L., Liu, X., He, L., Ma, L., & Du, K. A General LSTM-based Deep Learning Method for Estimating Neuronal Models and Inferring Neural Circuitry *Third Chinese Computational and Cognitive Neuroscience Conference*; June 2021; Shenzhen, China.

## WORKING EXPERIENCE

**Leader of Application Research Team** **Beijing Academy of Artificial Intelligence**  
Life Simulation Research Center Jun 2021 - Sept 2021

- Organized research cooperation among researchers and interns.
- Scheduled and summarized weekly discussions on the progress of research projects of the group members.

**Software Development Engineer** **Beijing Academy of Artificial Intelligence**  
Life Simulation Research Center Jun 2020 - Sept 2021

- Developed an automatic tool for parameter estimation and optimization for computational neural models.
- Published a preprint paper of the tool on bioRxiv.

## TEACHING EXPERIENCE

**Compiler Practice** **Peking University**  
Teaching Assistant Feb 2020 - Jun 2020

- Guided students to work through each stage of compiler design, including symbol table construction, type check, intermediate representation generation, register allocation.

**Algorithm Design and Analysis Seminar** **Peking University**  
Teaching Assistant Feb 2019 - Jun 2019

- Reviewed and expanded lecture content based on *Introduction to Algorithms*
- Designed exam papers and provided references on reinforcement learning.

## ACADEMIC SERVICE

**Reviewer of Bioscience Horizons** Nov 2021 - Present

## LEADERSHIPS

**Badminton Association in Peking University** **Peking University**  
President Sept 2019 - Jun 2020

- Organized badminton competitions at Peking University and scheduled friendly matches among colleges.
- Popularized badminton through social media at Peking University.

**Badminton Team of Peking University** **Peking University**  
Captain Sept 2019 - Jun 2020

- Led weekly training and participated in competitions.

## AWARDS

Outstanding Graduate of Peking University	Sept 2019
Robin Li Scholarship of Peking University	Sept 2019
Excellent Research of Peking University	Sept 2019
Ke Chuanglong Scholarship of Peking University	Sept 2018
Merited Student of Peking University	Sept 2018 & Sept 2017
May Fourth Scholarship of Peking University	Sept 2017

## SKILLS

<b>Languages</b>	Python, C/C++, MATLAB
<b>Framework</b>	NEURON, NEST, PyTorch
